Blockchain Technology

The 21st century is all about technology. With the increasing need for modernization in our day-to-day lives, people are open to accepting new technologies. From using a remote for controlling devices to using voice notes for giving commands; modern technology has made space in our regular lives. Technologies like augmented reality and IoT that have gained pace in the past decade and now there's a new addition to the pack i.e. Blockchain Technology.

Blockchain can be described as a data structure that holds transactional records and while ensuring security, transparency, and decentralization. You can also think of it as a chain or records stored in the forms of blocks which are controlled by no single authority. A blockchain is a distributed ledger that is completely open to any and everyone on the network. Once any information is stored on a blockchain, it is extremely difficult to change or alter it.

Each transaction on a blockchain is secured with a digital signature that proves its authenticity. Due to the use of encryption and digital signatures, the data stored on the blockchain is tamper-proof and cannot be changed.

Blockchain technology allows all the network participants to reach an agreement, commonly known as consensus. All the data stored on a blockchain is recorded digitally and has a common history which is available for all the network participants. This way, the chances of any fraudulent activity or duplication of transactions is eliminated without the need of a third-party.

How Does a Blockchain Work?

A blockchain is a chain of blocks that contain data or information. Despite being discovered earlier, the first successful and popular application of the Blockchain technology came into being in the year 2009 by Satoshi Nakamoto. He created the first digital cryptocurrency called Bitcoin through the use of Blockchain technology. Let's understand how a blockchain actually works.

Each block in a blockchain network stores some information along with the hash of its previous block. A hash is a unique mathematical code which belongs to a specific block. If the information inside the block is modified, the hash of the block will be subject to modification too. The connection of blocks through unique hash keys is what makes blockchain secure.

How Blockchain Transactions Take Place?

While transactions take place on a blockchain, there are nodes on the network that validate these transactions. In order for a transaction to be valid, each block must refer to the hash of its preceding block.

1. A blockchain network makes use of public and private keys in order to form a digital signature ensuring security and consent.
2. Once the authentication is ensured through these keys, the need for authorization arises.
3. Blockchain allows participants of the network to perform mathematical verification and reach a consensus to agree on any particular value.
4. While making a transfer, the sender uses their private key and announces the transaction information over the network. A block is created containing information such as digital signature, timestamp, and the receiver's public key.
5. This block of information is broadcasted through the network and the validation process starts.
6. Miners all over the network start solving the mathematical puzzle related to the transaction in order to process it. Solving this puzzle requires the miners to invest their computing power.
7. Upon solving the puzzle first, the miner receives rewards in the form of bitcoins. Such kind of problems is referred to as proof-of-work mathematical problems.
8. Once the majority of nodes in the network come to a consensus and agree to a common solution, the block is time stamped and added to the existing blockchain. This block can contain anything from money to data to messages.
9. After the new block is added to the chain, the existing copies of blockchain are updated for all the nodes on the network.

SAXCOIN

saxcoin is an innovative-reliable and flexible payment token that provide Security and control over your money. saxcoin works everywhere and anytime and provide Fast international transactions. It is most secure payment solution because saxcoin Protect your identity and Protection against any fraud.

Mission

We want to make the world a better and safer place. Our mission is to create a next-generation complete all-in-one platform with a decentralized blockchain to give every person in the world an equal chance to manage and improve their financial security while simultaneously giving back to charities worldwide while taking care of security.

VISION

SAXCOIN's vision is to create economic opportunity for every shareholder while simultaneously working towards a world without poverty, disease and building a level playing field for everyone

Introduction

Digital assets are programmable assets that exist in the form of electronic data. With Blockchain technology, the digitization of assets can be decentralized, trustful, traceable, highly transparent, and free of intermediaries. SAXCOIN the best decentralized platform for the Binance Smart Chain Network. saxcoin will empower crypto projects with the ability to distribute tokens and increase liquidity.

saxcoin easy cryptocurrency payments integration which provide Payment Protocol with strong protection because it uses crypto and blockchain payments, which promises to facilitate fast, secure, low-cost international payment processing services (and other transactions) through the use of encrypted distributed ledgers that provide trusted real-time verification of transactions without the need for intermediaries such as correspondent banks.

The Lost Key Recovery System smart contract has been proposed to restore lost tokens. saxcoin also plans to launch Organizational Tokens, NFT Tokens, Crowdfunding Tokens (DeFi).

Audit will be done by us. We will choose one of the most trusted blockchain security technology companies in the world and is on the cutting edge of research and innovation. Their involvement in the UP Alliance further demonstrates UPP's commitment to smart contract code integrity, transparency, and value substantiation. While audit can reveal exploits and other security weaknesses to blockchain outfits, they do not fix any of the issues. The audit simply finds them and offer advice for patching security holes to companies.

Tokenomics

There is a total supply of 100000000000 ≈ 100 billion SAXCOIN tokens with Decimals(18): the company hold for long time 10% of all the SAXCOIN Tokens issued. These tokens in order to ensure our investors that we have the best intention and maintain a long-term vision for the project.

We will providing high liquidity SAXCOIN will be a stable market, with few fluctuations in price. Marketing wallet this is important for the SAXCOIN token,

09

Roadmap

After successfully launching our flagship project saxcoin, we have established ourselves as a legitimate development team and have a growing community supporting the project. See the breakdown of Road Map below:

PHASE 1 (Q1 2022)

- Development SAXCOIN (Website & Token)
- SAXCOIN project kick-off
- Prepare Whitepaper

PHASE 2 (Q2 2022)

- Release Whitepaper in public
- Release the website in public
- Listing on DEX
- Public presales and IDO
- Start Fair Launch
- Community building
- Start system design

PHASE 3 (Q3 2022)

- Listing on Coingecko
- Listing on Coinmarket Cap
- SAXCOIN Store and DABots IBO, stake, voting
- Centralized Exchange

PHASE 4 (Q4 2022)

- Architecting NFT Exchange
- SAXCOIN Bots: DEX bots, Farming bots
- SAXCOIN Wallet
- SAXCOIN Game
- SAXCOIN Exchange (P2P)
- NFT Marketplace

Marketing

saxcoin is a unique, fully automatic and secure service. This platform has many advantages over its competitors. We initially expect to gain market share through ICOs. This user base will provide us with a solid foundation for future development, and rapidly increase the project's profitability. We have created a marketing plan that will help us increase the awareness level of the saxcoin and gain traction with our target markets.

We have already expanded our team since the start of the project. We will be better able to hire people as time goes on and our capital increases, our roadmap better explains the graduated approach we have in mind for this. We have also made contact and are in detailed talks with some sources who are interested in becoming advisors of our project. These highly influential individuals will allow us to get audiences with reputable news outlets and investors, hugely beneficial to funding the continuation of our project and boosting awareness of it. Our aim is to leverage the experience and knowledge of these people to fulfil our goal of making this project a success.

Why SAXCOIN?

SAXCOIN is the best decentralized Token platform. We believe in decentralization. Crypto currencies should not be subjected to control by any central authorities. Our system enables you to register instantly allowing you to trade instantly from any place and anytime and provide Fast international transactions. It is most secure payment solution because SAXCOIN Protect your identity and Protection against any fraud.

Token Information

Token name: SAXCOIN Token
Token symbol: SAX
Total supply: 2,000,000,000,000,000 SAX
Specifications: BEP20 Token

A decentralized blockchain for decentralized protocols on #BSC project fastest and protected operations in #DeFi.

The SAXCOIN will be a web based ICO Launch, this Blockchain application will be built using Smart chain platform with BEP20 standards.

Conclusion

As the saying goes, the stone age didn't end because we ran out of solutions, we moved up to better solutions. For the same reasons today, SAXCOIN is the most desired and trusted blockchain based payment gateway, built on Binance smart chain. Cryptocurrencies will change the world and SAXCOIN wants to be there when it happens by offering an innovative and secure platform to allow the world to invest and make profits.

Take advantage of our global token payment gateway made easy and accessible for everyone whether you're a business owner, crypto user, or even from another planet. SAXCOIN is the token payment gateway for all kinds of needs. Grow your business with a gateway that will save you time and money.

Get lightning-fast, low-cost token payments and payouts for your business with our powerful API. We are the global cryptocurrency payment provider for merchants & enterprise clients using our native token. With us you get real-time balance, transaction history with transparent fees, full data encryption & blockchain transparency. Reach potential customers across the world by using our token for payments.

With its easy setup, its highly competitive exchange rate & its no-charge backs payment system, SAXCOIN helps businesses to increase their revenue by accessing the growing cryptocurrency users from all over the world.

Our technology integration is simple & fast while end-users experience is optimal.
